

Annie K

Single screw workboat

Length: 7.95m

Beam: 3.1m

Draft: 1.22m

Propulsion: Single fixed screw

Bollard Pull: 0.9t

Surveyed to operate at the northern end of Port Phillip Bay, Annie K has been designed especially to be able to get under Melbourne's low city bridges, allowing her to transit the Yarra River as far as Dights Falls in Abbotsford.
